DETAILED ACTION

Claim Rejections - 35 USC § 102

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim 6 is rejected under 35 U.S.C. 102(e) as being anticipated by Takeuchi et al (US Patent No. 6,574,987). Takeuchi discloses an ejector cycle system whereby pressure energy is converted to speed energy and comprising: a nozzle (410), a suction port perpendicular to an axis of the nozzle (see figure 13) and fluid is sucked from the driving fluid jetted from the nozzle and are thereby mixed causing an increase in pressure by converting to the speed energy (see column 2, lines 35-50).

Allowable Subject Matter

Claims 1-5 & 7-9 are allowed over the prior art of record.
